

Since Chapter 13's oral exam does allow for the demonstration of your computational proficiency, you will submit the following report when you come to take your oral exam.

For each section in Chapter 13, indicate the homework problems completed (circle completed problems, add problem # for any unassigned problems you did and in 1-2 words describe any problems you made up and solved). Full credit will be awarded if you completed a **representative sampling** of problems throughout the chapter (you do not have to complete all problems to receive full credit).
