

You will prepare a video presentation 10-15 minutes in length of one (not both) of your projects, summarizing your research question and your analysis with appropriate justification of your findings/solution. It will be submitted shortly before the final project is due.

- Slides or visual aids of some kind are required.
  - They should be used effectively to enhance your presentation (DO NOT READ THEM to us).
  - Slides/visuals are neat, easy to follow, created using good choices regarding coloring, formatting, spacing, etc. to promote your message.
  - Your interaction with the slides/visuals is comfortable and effective.
- Your presentation should focus on your final conclusions, how the results of the analysis will inform decision-making, and the consideration of other important aspects of the analysis (as time allows).
- Personal presentation should be appropriate, professional, and compelling.
- The tone of your presentation is comfortable and conversational (not tense/awkward). This means that you understand well and are comfortable with the material that you are presenting and how you present it (it requires practice).
- You need to make efficient, effective, and appropriate use of your time to communicate clearly and effectively.

Your oral presentation grade will be based on the quality/clarity of the presentation you give (not the quality of your data analysis; however presenting poor/unsubstantial content well is nearly impossible).

SUBMISSION: Your submission should include your journal, your slides/visual aids, and your video presentation saved as an mp4 file.

ORAL (75 PTS)

DUE ONLINE: MARCH 3, 2026 OR APRIL 28, 2026, 11:59PM

## GRADING RUBRIC FOR ORAL PRESENTATION

\_\_\_\_\_/40% Slides/visual aids are used effectively

- Slides/visuals are used to complement the presentation (they are NOT read)
- Neat, easy to follow, good choices regarding coloring/formatting/spacing to promote message
- Interaction with the slides/visuals is comfortable and effective

\_\_\_\_\_/20% Sufficient and appropriate content: research question/context, final conclusions, how the results of the analysis will inform decision-making, consideration of other important aspects of the analysis, etc.

\_\_\_\_\_/30% Effective oral communication

- Efficient/effective/appropriate use of time to communicate clearly and effectively
- Tone of presentation is comfortable and conversational (not tense/awkward)
- Clearly evidence that you understand what you are talking about; inspired confidence in results

\_\_\_\_\_/10% Professional/appropriate/compelling personal presentation

\_\_\_\_\_/ 0% Penalty: Overall presentation - Slides/visuals not submitted; Failed to meet time requirements (~ 10-15 minutes); Failure to follow directions

\_\_\_\_\_% = \_\_\_\_\_ / 75 points
